

**10 YEAR
WARRANTY.**

**FOR ALL
INVERTERS
UP TO 10 KW.**

5+5 = 10 YEARS PEACE OF MIND. AS OF NOW ALL INVERTERS UP TO 10 KW WILL GET AN ADDITIONAL 5 YEARS PARTS WARRANTY ABSOLUTELY FREE.

/ Fronius has been developing innovative solutions in solar electronics for more than 20 years. As a leading international inverter manufacturer, our products are synonymous with extremely high quality and reliability.

/ In order to fulfil these high quality standards, we subject our inverters to extensive tests to ensure they can stand up to even the most demanding environmental conditions. Our products are more than a match for extreme temperatures, water spray, dust and salt.

/ We are delighted to share this peace of mind and the confidence we have in our products with you. Between 1st February and 30th June 2013 we will be offering an additional 5 year parts warranty on top of your 5 year manufacturer's warranty (under the warranty terms and conditions).¹

/ The parts warranty means that we will send out free replacement circuit boards to qualified Fronius Service Partners (FSPs), a list of which can be found on our website. If you choose not to use the FSP scheme then a charge² will be incurred in sending a replacement product to your installer.

/ For a list of FAQs relating to the "10 year warranty up to 10kW" visit our website at www.fronius.co.uk

¹ Offer valid for the Fronius IG series, the TL series and the entire IG Plus series (with the exception of IG Plus 150V-3). To validate your warranty, we may ask you to provide your purchase invoice, the serial number of the device and your commissioning report.
